THRILLS GALORE IN LEAGUE GAME COLE- MAN AND BLAIRMORE

Record Attendance of Season See Old Rivals Contend for
Leadership in First Half of League Series in Fast
Game Tuesday—Hard Fight for Supremacy
in Crow League Gives Blairmore
Close Victory

Before over 600 people here on Tuesday night Coleman Canadians man led by one goal in the first and Blairmore Bears played the period. The next two league games most thrilling game seen since the between these teams will excite days of semi-pro hockey in the keen interest.

Crows Nest Pass, when Coleman Penalties on the Coleman team supporters experienced the delight were incurred by Gate and Fraser, of seeing the home team leading at and on Blairmore by McVey, the close of the first period, then Vejpreva and Manson.

The keen edged excitement of Blair- The result put Blairmore with more evening the score in the 10 points to Coleman's eight in the end, and in the third the suspense first half of the league series, of a tie in which players and sup- one game for Blairmore to play porters were keyed up to the high- against Bellevue. The latter team est pitch, broken by a close upshot by Vejpreva which brought victory to Blairmore and clinched their leadership in the first half of the league series.

Coleman team put forth a splendid effort to even the score with their old rivals, and to win the pennant in the first half of the intermediate series, but were defeated by a score of 2-2, Blairmore getting a lucky break almost immediately after the opening of the game, when "Gusty" scored on which many claimed was an off-side shot, but no protest was raised by Coleman.

Coleman boys well earned the praise which was showered on them, this being the first season of the newly organized team, most of the players making their first break into senior hockey, while their opponents have the advantage of several years experience. Young Chapman of Coleman, who since the schedule opened has played as a sub, proved his worth by scoring the second goal for his team in the first period; the other was by Jim Fraser, fast centre player.

McKay from Vejpreva in the second period, and Vejpreva in the third secured the other goals for Blairmore.

Huffman and Stevulak played a good game and both came danger- ously near scoring for Coleman, but the fine combination work of the Blairmore men, especially around the nets, provided superior Colongrosso saved many dangerous shots on his goal, and with the exception of the first scored against him, defended his goal beyond criticism throughout the rest of the game.

NEW TEACHER AT WEST COLEMAN

Miss Margaret G. Reid, formerly of Guernsey, Sask., was appointed from 24 applicants to the West Coleman school, in place of Miss May Muir, who recently sent in her resignation on the occasion of her marriage. Miss Reid has five years' experience and good references from Saskatchewan inspectors.

Miss Muir, who terminates her engagement at the end of January, has made many friends in Coleman, and she will be missed on the ladies' hockey team, of which she was a popular player.

RIM AND GUN CLUB MEETING

The Rod & Gun club executive held a meeting on Monday evening, when Secretary Rushton stated he had just enough money to pay all liabilities, but in future expenses will have to be curtailed or the membership fee increased to cover expenses. Mr. Rushton was accorded a vote of thanks for his work in piloting the club during the season of 1928, and on his success in finishing the season free of debt.

BLAIRMORE POLICE CHIEF LOSSES ACTION Failed to Secure Conviction Against Local Taxi-Owner in Blairmore Police Court.

A complaint against F. Barringham of carrying on the business of automobile livery in the town of Blairmore without first having obtained a license to do so contrary to a bylaw of the town, was dismissed by Police Magistrate Gresham on Monday. Mr. R. F. Barnes of Coleman appeared for Mr. Barringham.

The defence submitted that Mr. Barringham had not solicited business in Blairmore. It is a common practice for Coleman taxi-drivers to take passengers to the neighboring towns, and if they are asked to bring passengers back from those towns, even though they are residents of those towns, they are not guilty of breaking a bylaw, but under their provincial licenses they may pick up anybody who stops them on the highway.

CHRISTMAS TREE GIVES PLEASURE TO CHILDREN

St. Alban's S. S. Children Have A
Merry Evening with
Santa Claus.

St. Alban's Sunday school Christmas tree concert held last Thursday proved very enjoyable, the following program being given by the children: "Carol, Sweetly Carol," the school; welcome address, Peggy Hoyle; game of letters, "A Merry Christmas," 14 boys; solo, "Away in the Manger," Violet Currie; piano duet, Marjorie and Wilma Halliwell; dialogue, "Just So Its Christmas," Mary Snyder and Muriel Ledieu; chorus, "Santa Is Coming," junior pupils; Highland Fling, Kathleen and Mary Hoyle; piano solo Violet Currie; chorus, "Holy Night," senior girls; dialogue, "Christmas," Wilma Halliwell, Ruth Sudworth, Fred and Tom Goldring; play, "Trimming the Christmas Tree," 32 boys and girls; recitations by the following: Dorothy Gate, Dorothy Brown, Douglas Moores, Alfie Jones, Alice Sudworth, Alan Phillips, Elsie Snyder, Dolly Locke, Mary Hoyle.

Thanks are due Mrs. Clifford and Miss Hilda Clifford for the excellent manner in which the concert was given. At the conclusion Santa arrived and distributed presents to the children.

PRIZE WINNERS AT REBEKAHS AND ODDFELLOWS DRIVE

Last Saturday night's winners are as follows: Mrs. F. Yates, Mrs. J. I. Lonsbury, A. J. Brown, W. Lonsbury.

A joint installation of officers of I.O.O.F. Lodge No. 36 and Victoria Rebekah Lodge No. 7 will take place in the lodge room on Jan. 14 at 8 p.m. Refreshments and a social evening will follow. Visiting Oddfellows and Rebekahs are cordially invited.

COLEMAN COUPLE'S SILVER WEDDING

Many Friends Gather to Join in 25th
Wedding Anniversary of Well-
Known Couple.

The silver wedding anniversary of Mr. and Mrs. Frank Patterson was celebrated on New Year's Day at their home. Dinner was served at noon, 23 guests sitting down, including the following:

Mrs. Hunter of Fernie, sister of Mr. Patterson; Mr. N. Patterson and his wife, of Fernie; Mr. and Mrs. Brindley, of Fernie; local guests were Mrs. Bell Sr., Mrs. W. G. Fraser, Mr. and Mrs. Robert Holmes, James McKen, Benny Harrison, Amanda and Frances Brindley, Muriel Hunter, Joe Patterson from Fernie, Mammie McLennan, Gladys and Edna Higgins, both from.

Mr. and Mrs. Patterson were married in Alloa, Clackmannanshire, Scotland, and have lived in town for 16 years. One daughter, Mrs. Wilson (Grace) lives at Kellogg, Idaho, and Grace at home. Many fine presents were presented the happy couple in honor of the occasion.

AMBULANCE TEAMS TO HEAR LECTURES

Public Invited to Interesting Lantern
Lecture on First Aid
Sunday

The local branch of the St. John Ambulance Association cordially invite the public to a lantern lecture on Sunday afternoon at 2 o'clock in Central school. It is free and no collection will be taken.

The branch has distinguished itself in the competitions held in the Pass, and takes this means of further interesting the public in first aid work.

LEAVES NINE CHILDREN TO MOURN DEATH

Former Coleman Woman Died on
Farm Near Burmah—Buried
Here on Sunday.

The death occurred on Jan. 1 at the farm home six miles south of Burmah of Mrs. Kovach, wife of John Kovach, formerly of Coleman, and the funeral was held on Sunday afternoon, burial taking place in the cemetery here. Deceased came to Canada from Czechoslovakia, and had lived here for over 20 years. Nine children are left with their father to mourn a mother's loss, the youngest of whom is only six months old. A daughter of Mrs. Kovach worked at waitress in the Coleman Cafe during part of last year.

The Family Herald and Weekly Star of Montreal holds a record for subscribers renewing voluntarily and continuously year after year. After all it is not surprising when one considers the quantity and quality of the readers are given each week and at a price ridiculously low—\$1 a year or three years for \$2.

Better Health In 1929

A year or two after the close of the Great War, and when it was organizing its peace programme for "the improvement of health, the prevention of disease, and the mitigation of suffering," the Canadian Red Cross Society launched a monthly magazine for the purpose of arousing public interest in the matter of individual, community, and national health. With the end of 1928 publication of this largely with the individual. In announcing the cessation of publication, the Red Cross stated that in the intervening years the subject of health improvement and disease prevention had made such giant strides, and so many organizations and publications were devoting their energies to the subject, while almost every daily and weekly paper regularly printed health articles, that the same necessity did not exist for the Red Cross magazine, consequently the money it cost to produce could be devoted to other purposes.

There has certainly been a gratifying increase in public interest in health matters in the years following the war. With all its awfulness, tragedies and enormous loss, the war at least served the purpose of advancing the cause of health. Today, Canada is probably the healthiest country in the world, but, even so, there is still vast room for improvement, and that improvement cannot be brought about by medical men, governments, hospitals, and health organizations. It rests largely with the individual.

In the past it has been true to a great extent that people only became actively interested in their health when they became sick, notwithstanding the fact that every intelligent person will frankly admit that prevention is better than cure. In all industry in this age special efforts are directed at the elimination of waste and all unnecessary costs in business. Yet loss of time, loss of efficiency, loss in productivity, loss of earnings by the employee and of profits by the employer, loss occasioned by increased expenses at the very time when income is decreased or stops, is the direct result of sickness. It is the cause of the greatest aggregate loss in our national life.

No better New Year resolution can be made, or observed, by the individual, or the community, than one which finds expression in a determination to safeguard health. Such a resolution adds force at this particular time when an epidemic of influenza is again sweeping the continent, although, fortunately, of a milder type than those of some years ago. Influenza is very contagious, but, on the other hand, it can be easily combated through the taking of very simple precautions. If it is not so combated at its inception, it may quickly result in serious complications such as bronchitis, intestinal trouble, or pneumonia.

All health authorities are alive to the danger; so, too, are the life insurance companies, and all are engaged in extensive publicity campaigns to acquaint people of the danger and to make known to them the simple precautions they should exercise. Thousands of dollars are being spent in newspaper advertising and other forms of publicity, and it is money well spent; but it will, nevertheless, be largely wasted unless the masses of the people to these appeals and advice is directed properly by it.

This new year of 1929 cannot be a happy, prosperous year if sickness overtakes the homes of Canada, followed by death carrying off loved ones, or leaving members of the family weakened and liable to contract other forms of disease. Good health is the first essential to happiness. Without it no person, community or nation can be prosperous.

The Canadian people cannot render better service to themselves and their country than by giving immediate and constantly continuing attention to their health. By so doing they will be laying the only sure foundation to happiness, prosperity, progress.

League Of Nations

Coast To Coast Membership Drive To Take Place In April

The weekly and daily newspapers of Canada are warm supporters of the League, it was stated at the regular monthly meeting of the League of Nations Society held in Ottawa, when arrangements were discussed for the membership drive to take place next April. Throughout the length and breadth of the Dominion, it was said, editors have shown an interest in the activities of the League of Nations and in the efforts of the Society to promote it in this country. The support of the press will prove a great asset in the annual "Coast to Coast" Membership Drive due to take place on April 16th, 1929, which will be known as "League of Nations Day."

Testing Canada's Fuels

The Department of Mines has erected in Ottawa a new Fuel Research Laboratory building, which has been equipped with modern instruments and machinery for conducting extensive research on Canadian fuels—solid, liquid, and gaseous.

No man or woman should doubt painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Passenger automobiles made in Germany this year number one-third more than last year.

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura-Soup and hot water without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

Send for Free Booklet, "How to Cure Skin Diseases," to The Cuticura Soap Co., New York, N.Y.

Grand Champion Steer

Alberta Steer Is Sold For A Net Sum Of \$1,250

A new record was set for Alberta. In the disposal by MacKenzie Brothers, of Lacombe, of Earl Marshall, the steer which recently won the grand championship at Vancouver for a net sum of \$1,250. This steer, which was bred by a Prince Marshall bull, owned by S. Henderson of Lacombe, weighed 1,250 lbs. and was purchased by Jackson Brothers, of Vancouver, at \$1 per pound—the highest price ever paid for an Alberta fed steer.

WEAK, LISTLESS GIRLS

Need Such A Tonic As Dr. Williams' Pink Pills To Restore Health

When a girl in her teens becomes pale and listless, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work, and if she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumb, of St. Louis, Mo., is a good illustration of the weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills have made me stand in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail for 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CORN AND CELERY

2 cups corn (canned or fresh cut).

- 1 cup celery (finely chopped).
- 1 cup buttered dry bread crumbs.
- 1 teaspoon salt.
- 1 small green pepper chopped.
- 2 tablespoons butter.
- 1 cup hot milk.

Arrange corn, peppers, celery and crumbs in two alternate layers in a buttered baking dish. Add butter to hot milk and pour over the vegetables. Cover with buttered crumbs and bake 30 to 40 minutes. Serve eight.

RICE WITH DATES

- 1 cup rice.
- 3 cups boiling water.
- 1 teaspoon salt.
- 1 cup dates.

Wash rice and add to boiling water. Add salt and boil 5 minutes. Cook in double boiler 30 minutes. Add dates, cut in pieces, and cook until rice is tender and all the water has been absorbed. Serve hot or cold with milk or cream.

Quite Simple

"Yes," said the timid passenger to the airplane pilot, "I understand I'm to sit still and not be afraid and all that, but tell me, if something happens and we fall what do I do?" "Oh, that's easy," said the pilot. "Just grab anything that we're passing and hang on."

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Canada's Dairy Herds

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1928.

For frostbite use Minard's Liniment.

She: "A fortune teller says I have a lot of money coming to me." He: "It may be true, it may be, but I would rather hear a paying teller say that."

Life is terribly short, considering it takes the average person fifty years to accumulate just a little bit of sense.

Canadian Firm Gets Contract

Will Supply R.C.A.F. With Moth Planes To Be Assembled In Canada

The de Havilland Aircraft Company Limited, has received notification from the director of contracts, of the Department of National Defence that their tender for the supply of Moth aircraft for the re-equipment of the Royal Canadian Air Force had been accepted.

An order was placed immediately for thirty-four two-seater Moth light aeroplanes, twenty-eight being land planes for the re-equipment of the Camp Borden station. These machines will replace the old "Lynx Avro" at present in use, will be used for the training of personnel of the force and for the annual flying courses for probationary flying officers who attend during the summer months. The remaining machines are Moth seaplanes for the equipment of the station at Vancouver.

It is a significant fact that all these machines are to be equipped with the Handley-Page automatic safety slits which render an aeroplane as nearly fool-proof as possible.

The Moths will be of the latest metal fuselage type which has been specially evolved for Canadian flying conditions and recently passed all tests at Ottawa with flying colors.

The order includes six spare Gipsy engines and approximates in value to \$200,000.

The Moths will be partly manufactured in England, but assembled and tested at the de Havilland Company's plant at Mount Dennis, Ont., delivery is to be completed by March 31.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relieving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

The Way It Is Done Here

Canada and the United States seem queer to Europe. When they want something from one another, they buy it instead of training soldiers to take it—Fortified Express.

You may have more than you need, but you never have more than you want.

Two Hundred Mile Dog Derby Returns To North Country

Famous Mushers Will Race This Year From The Pas To The Flin Flon

After a lapse of four years, the endurance dog derby, which once thrilled the north country, and it might even be said, the world, is returning to The Pas. The gruelling non-stop race which brought fame to northern Manitoba and its hardy mushers will be revived at the frontier town's winter carnival, March 4 to 7. This time, romance will be added to romance. The course will be from The Pas to the famous Flin Flon mine and back, a distance of 200 miles.

Two thousand dollars in cash prizes, besides other valuable awards, and the Walter Goyne-Grant Rife memorial cup, which has an intrinsic value of \$1,000, will attract mushers from wherever mushers mush. The winner will have the dog racing championship of the world.

"Shorty" Russek, veteran driver, and the youthful, though none the less noted Emil St. Godard, present world's champion, each have a leg on the memorial cup. St. Godard will be one of the leading contestants this year, and it is likely that Russek will also enter. Other noted mushers are bound to make a strong bid for more fame at the derby since it has gone back to epic proportions. Seppala, Alaska's pride, has been itching for another endurance race, his friends say, and other mushers, from both the east and the west, have already sent in their applications for entrance forms.

Drivers are already training their teams for the test in March. St. Godard's dogs are in fine shape after a summer and a fall of workouts. The team of the French-Canadian musher had been trained for the speedier, 100-mile lap races of the last three years, but Emil claims that the dogs have the endurance for the longer route. They have been harnessed to an auto chassis in the warm months and are in good condition for the snow trail.

All the color, the joys and the sorrows of the land of the northern lights is crowded into the romantic history of dog racing at The Pas.

Happiness is not in getting what you want, but in not wanting what you can't get.

Turkey has been a feature of Yuletide fare since the sixteenth century.

Powerful Medicine.—The healing properties in 48 essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in alleviating pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

More than 2,100 miles of motor rail postal routes were started in Germany in the past fiscal year.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthy body, sound bones and teeth.

Scott & Bowne, Toronto, Ont.

Standards Of Intelligence

Impossible To Measure Intelligence With A Foot Rule

Dr. Edward E. Free, a noted chemist, tells the American Society of Mechanical Engineers that of mechanics are the most intelligent class in the nation. Second come engineers; third, business men. Last of all, but safely out of the category of morons, come actors, preachers, doctors and college professors.

And how does Dr. Free measure intelligence? It is "the ability to reach a reasonably correct conclusion from a set of discoverable facts." But of sets of facts there are all kinds and varieties. Perhaps Dr. Free would tend to over-emphasize the relative importance of chemical facts. Yet if so, one wonders why he ranks college professors so low in his scale. Surely such professors as Dr. Millikan and Dr. Compton should take high rank even on mere scientific grounds. A physician like Dr. Hasting, the developer of insulin, might be assumed to possess some degree of brain power and logical capacity.

Intelligence is imponderable. It is not to be tested with a foot-rule. It has as many standards as there are people to apply them. Because Shakespeare was an actor we should not be inclined to seat him below the salt at a banquet table of mechanical engineers, just one remove from the half-wits. — New York world.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy. So easy, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

What She Reduped

Robert: "I'm never going to take Miss Townsend out to dine again. Too expensive."

Robert: "She told me she was reducing."

Robert: "She was. She reduced my bank-roll about 15 bucks!"

Russia, which stands third in the number of automobiles, is thirty-fourth in the number of automobiles.

WINDOLITE The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding this vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and it has a most beneficial effect on the growth and development of plants and chickens and on the well-being of man. It enabled the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years come to the attention of the world as a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

OPENING OF PARLIAMENT ON FEBRUARY 7TH

Ottawa.—Parliament will open on Thursday, February 7. Official announcement to this effect was made recently by Premier King, at the conclusion of a meeting of cabinet council.

The Prime Minister stated that no appointments to governmental vacancies were made at the sitting of the cabinet.

Hon. R. B. Bennett, Conservative leader, who is now in Europe, will return to the capital about the middle of this month. Mr. Bennett sailed for England two weeks before Christmas on a brief holiday prior to the opening of parliament.

Political prognosticators forecast that the session opening next month will be much livelier than the previous one. With occasional rumors in the air of a possible general election next fall, the likelihood is that debates in both the commons and the senate will be somewhat more spirited.

No intimation has been made in official circles, though, on the possibility of an election this year. Two general elections have been held in the Dominion during the past few years, one in 1925 and the last one in 1926; and there are many political observers who lean towards the opinion that no further appeal will be made to the people before 1930.

The budget, it is understood, will be brought down early during the coming session. Presentation of this document, containing as it does the government's fiscal policy with any changes to be made in the tariff, is always eagerly awaited.

Indications are that the coming session of parliament will run well into June. While the legislative program of the government has not been indicated, a number of important matters are definitely scheduled to come before parliament for necessary action.

Recently, Hon. Charles Stewart, Minister of the Interior, announced that a bill for the return of natural resources to British Columbia would probably be introduced in the course of the approaching session.

Negotiations for the return of natural resources to Alberta are also well advanced, and legislation may possibly be introduced in this case during the session. Premier J. G. Gardiner, of Saskatchewan, is due to arrive in the capital early next month to discuss the question of the early return of natural resources to his province.

The whole question of the stimulation of immigration to Canada will likely receive attention.

Monoplanes Reach Hudson Bay Coast

Carried Supplies From Cochrane, Ontario, To Eight Prospects. Winnpeg.—Two superb monoplanes of the Northern Aerial Mines Exploration Company have arrived on the east coast of Hudson Bay, near Richmond Gulf, after a flight from Cochrane, Ont., where they left on Dec. 23. The planes were piloted by Captain H. A. (Doc) Oakes and Patrick Reid, who were accompanied by two mechanics. The purpose of the flight was to bring supplies to eight prospectors who have been stationed on the east coast of Hudson Bay since early summer.

New Commander For Rangers

Ottawa.—Included in the promotions announced by the department of national defense is that of Major E. Poole to the rank of lieutenant-colonel, and to command the Rocky Mountain Rangers, with headquarters at Kamloops, B.C., vice Lieut.-Col. T. Aldworth, who has been transferred to the reserve of officers.

New Air Marshal Appointed

London, Eng.—Sir Philip Matland Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, who resigned December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

Students May Make Change

Toronto.—The scheme whereby University students may exchange from one Canadian university to another for one year of the course will come into effect in 1929, according to L. J. Green, president of the National Federation of Canadian University students which recently held its annual convention at Kingston.

W. N. U. 1787

To Preserve Niagara Falls

Treaty Is Signed Between Canada and United States

Ottawa, Ont.—The construction of remedial works in the Niagara River designed to distribute the water so as to ensure at all times unbroken crestlines on both Canadian and American Falls, is provided for in a treaty between Canada and United States which was signed at the office of the Prime Minister here.

In addition to providing for the construction of these works, provision is made for each country to divert an additional 10,000 cubic feet of water per second for power purposes. These diversions will be permitted only "during the winter or non-tourist season, beginning on the first day of October and ending on the 31st day of March of the following year."

The treaty was signed by Right Hon. W. L. Mackenzie King, acting in the capacity of plenipotentiary for his Majesty the King, and by Hon. William Phillips, United States minister to Canada, as plenipotentiary for his government.

Revising Regulations

On Incoming Autos

Officials At Ottawa Welcoming Opinion On Reducing Restrictions

Ottawa, Ont.—Business men of Western Canada are taking an active interest in the revision of the Customs regulations in regard to the entry from the United States of automobiles.

The Department of National Revenue has been engaged for some time in this re-drafting of these regulations with the purpose of removing objectionable restrictions on incoming automobiles, and such has been the interest of business men in the west that the work has been delayed temporarily until all representations have been received.

Many board of trades have written to the department, and the officials are welcoming every expression of opinion. Every effort will be made to so re-draft the regulations that they will be acceptable.

Langner Leaves Canada

Man Who Investigated Ambrose Small Case, Has Gone To West Indies

Toronto.—Dr. Adolph Maximilian Langner, who investigated the Ambrose Small case here, some weeks ago, has gone to the West Indies, and later will go to Mexico. These sections are presumably more sympathetic to his theories and methods than Canada, where authorities, according to his own statement, exhibited a disinclination to renew his immigration permit as a visitor in this country.

As on his previous departure from Toronto, he promises to return, make sensational disclosures regarding the Small case, and "solve the mystery in spite of all they can do." Influence was brought to bear by his enemies and opponents in the Small case, he said, before his departure, with the object of preventing him continuing his investigation of the mystery.

Early Seeding

Marquis Wheat Sown At Indian Head On January 2nd.

Indian Head, Sask.—Saskatchewan in past years has been noted for the creation of records, some of them strange and unusual, and on the second day of 1929, another was added, that will stand for some time.

This was the seeding of spring wheat, five acres of Marquis being planted on an experimental plot at the experimental station farm. At 5 o'clock, the superintendent ordered his men and teams out, and according to information given Wednesday afternoon, the five acres were seeded before dinner.

The land, summer-fallow, was in excellent shape, and the wheat was buried to quite a depth.

New Hotel Is Assured

Saskatoon, Sask.—Definite assurance of construction of a new C.N.R. hotel, consistent in size and character with the needs of the city of Saskatoon, was contained in a telegram received by Mayor G. W. Norman, of Saskatoon, from Sir Henry Thornton, president of the Canadian National Railways.

British Members Nominated

London, Eng.—The British government has nominated Sir Josiah Stamp and Lord Revelstoke as the British members of the projected committee of experts on reparations. The names of the two deputy members will be announced later.

Was Pioneer Railroad Builder

Fat Welch, Well Known In West, Dies In California

Spokane, Wash.—Fat Welch, 70, member of the firm of Stewart and Welch, railroad builders, died recently at Coronado, California, a telegram to relatives here said. Mr. Welch, who had gone to California for his health last summer, had been ill for nearly four years.

Associated with Major General John Stewart, of Vancouver, B.C., Welch had a part of the construction of many railroads in the north-west with General Stewart, held many contracts in the United States, Canada, Great Britain and Africa.

The Flu Scourge

Epidemic Most Severe In Nova Scotia and Ontario

Ottawa, Ont.—Ontario and Nova Scotia are the two provinces of the Dominion where the ravages of the flu are most severe at present, declared Dr. J. A. Amyot, deputy minister of health, but the visitation of the scourge this winter is by no means as serious as those of 1918, 1919, and 1926.

The complications which accompanied the malady in those years have not been present to such an extent in the present epidemic.

ECONOMIC LIFE OF GERMANY IS REPORTED SOUND

Berlin.—Confidence in Germany's economic soundness is the dominant note in Agent-General Seymour Parker Gilbert's report for the fourth reparation annuity year made public Tuesday.

The report paints a complimentary picture of Germany's entire economic life. The agent-general testifies to Germany's punctilious payments of all sums due on the reparations accounts and describes Germany as placing the product of her science, skill and labor at the disposal of creditor nations in an effort to pay for the war.

With reference to payments for the current annuity year the report forecasts that "no question can fairly arise, in the light of practical experience thus far, as to the ability of the reich to provide the full amount of its standard contribution of the plan."

The report states that the payments and transfers during the year amounted to 1,730,000,000 gold marks (about \$440,000,000).

The report proceeds to show that the total annuity of the fourth year was almost one and three-quarter billion marks, of which France receives more than one billion (about \$250,000,000).

The list of creditors included France, Great Britain, Italy, Belgium, Yugoslavia, United States, Rumania, Japan, Portugal, Greece and Poland.

HEADS NATIVE SONS

Dr. James Cotton, president of the Native Sons of Canada, who expressed fear that Canada's new immigration agreement with Britain may bring too many settlers here, thereby increasing unemployment and driving Canadians to the United States.

Prisoners Help Fund

For Distressed Miners

Heard Appeal Made By Prince On Christmas Day

London, Eng.—Evidence is fast accumulating of the added impetus given the lord mayor's fund for relief of families of distressed miners by the personal appeal of the Prince of Wales broadcast by radio on Christmas Day. The fund now amounts to nearly \$2,000,000 exclusive of the governmental contribution which is to double it.

The governor of a certain prison has sent along \$55 "from the prisoners who heard the Prince." Many letters received at the headquarters of the fund, the Mansion House, are addressed to the Prince personally.

Canada's Trade With U.S.

Best Customer Last Year Says Bulletin Issued At Washington

Washington, D.C.—Canada literally purchased a little of everything American manufacturers had to offer during the first ten months of 1928, and may have "bought the Brooklyn Bridge" if Uncle Sam offered such a structure for sale.

This makes the substance of "our world trade" says a bulletin issued by the foreign commerce department of the Chamber of Commerce of the United States. It stated that the Dominion was the best customer of the United States during the designated period.

Famous Analyst Dead

Ottawa.—Dr. Anthony McGill, M.A., B.Sc., LL.D., formerly chief Dominion analyst, is dead at his home in Berkeley, Calif., according to word received in Ottawa by relatives. His death occurred on Saturday, December 29. He was 81 years old. Dr. McGill was one of Canada's most prominent chemists and was an outstanding figure in scientific circles.

FAVORITE PHOTOGRAPH OF PRINCE

Here is reproduced a photograph of the Prince of Wales which was taken from the Illustrated London News. This picture is declared to be the best ever secured of the young man who recently returned from the big game haunts of Africa to the sick room of his father, King George.

Two Opposite Camps

Difference of Opinion Within the Ranks of Salvation Army

London, Eng.—For the first time both parties within the Salvation Army have openly admitted that the high council which will meet shortly was composed of two opposite camps.

Officials at the international headquarters and at the headquarters of Evangeline Booth, head of the Army in the United States, freely made pronouncements on the probable line of voting when the question of removal of General Bramwell Booth as commander-in-chief, and reorganization of the Army will come up.

An official of the Evangeline Booth group stated that after a careful canvass the group was satisfied more than the necessary three-quarters majority of the council will vote for the removal of General Booth and subsequent reorganization.

At international headquarters those who are supporting General Booth refused to concede a possible victory to the other camp, saying that they were sure of at least seven votes, and that they believed the council would vote confidence in the general to continue his leadership.

They said, however, the method of choosing a successor, and other administrative reforms, might be effected, and that even certain of those who would support the general would favor this.

Vancouver Adds To Official Population

Suburbs Have Been Absorbed By Coast Metropolis

Vancouver.—The Pandemonium which welcomed the New Year also marked the beginning of a new Vancouver. This city added some 80,000 to its official population at the last stroke of 12. The hitherto separate municipalities of Point Grey and Vancouver South merged with Vancouver proper to form one metropolis with a population of 220,885, according to figures drawn up in a survey completed in December, 1927.

A local directory, however, places the total population at 277,680. According to the lower estimate, Vancouver brought in a population of 142,150, South Vancouver 45,500, and Point Grey, 33,233. Thus this Pacific gateway, which less than half a century ago was but a settlement, has reached a position where it lays claim to be Canada's third city. The next Dominion census will officially place the rumor as between Vancouver and Winnipeg.

EFFICIENCY OF NEW COMBINES AMPLY PROVEN

Ottawa.—Contributing to the progressive transition of Canada's farming industry, one of the more recent labor-saving devices, the reaper-thresher, or "combine" is playing an important part, according to E. S. Archibald, director of Dominion experimental farms.

Latest statistics, compiled by the federal department of agriculture, show that more than \$12,000,000 have already been invested in this new harvesting machine by farmers of the prairie provinces. It is also estimated that more than 3,500,000 acres of grain were cut and threshed during 1928 by the new method.

Saskatchewan, the premier grain producing province of the Dominion, leads in the number of combines in use with a total of 2,356. In Alberta 1,905 machines were in operation, while 206 were introduced in Manitoba.

Exhaustive experiments with the combine have been conducted by the federal department. Data has also been collected from owners scattered throughout the Dominion. From this information it has been established that very little trouble is being experienced in operation of the combine and that grain kept with out loss in grade or milling quality.

The survey further revealed that harvesting with combines resulted in an approximate saving of eight or nine cents per bushel. A number of owners reported a saving of grain averaging 2.26 bushels per acre and that better grades were received than for binder harvested grain. A few received lower grades, while the majority of users noted no difference.

The canvass indicated that weeds caused delays in some sections. Several operators, however, stated that burning of combine stubble and straw had rendered the succeeding crop free from weeds and in several instances had increased the yield from two to six bushels an acre.

ESTABLISHMENT OF AIR MAIL IS FURTHER URGED

Calgary, Alta.—Resolutions requesting that the post office department should establish an air mail service in Western Canada connecting all the principal cities, and that the Dominion Government should help to bear the expense of lighting air ports, which would result from air mail service, were passed at the air conference held here, at which seven western cities were represented.

Tariffs for both visiting planes and those with headquarters in these cities were arranged, while the cities laid down a uniform policy with regard to companies and private individuals taking leases for accommodation on municipally owned aerodromes.

Final control of all municipally-owned airports will remain with the municipalities. It was decided, even though the cities hand over the administration of the flying fields to official aero clubs.

The following were present: Mayor F. E. Osborne and Commissioner A. G. Graves, representing Calgary; Mayor A. U. G. Bury, of Edmonton; Commissioner J. Leslie, of Saskatoon; T. J. Emerson, of Moose Jaw; Mayor I. Bullivant, of Medicine Hat. Regina was represented by George M. Bell, of Calgary, while Emil Sieck, also of Calgary, represented Lethbridge.

The conference was attended by J. B. Corley, district superintendent of the post office, Capt. Fred McCall of the Great Western Airways, and D. K. Yorath, of Calgary Aero Club.

In discussing the possibility of re-establishment of the air mail service, Mr. Corley stated that in his opinion night flying was necessary, and that this has come to be accepted thing in the United States.

Conditions on the prairies were as good as anywhere in Canada, Mr. Corley stated, and it had been shown in the test recently conducted that 24 hours could be saved in the transportation of mail by air. Plans were able to make train connections.

The test period had been an experiment to try out the possibilities of winter flying with mail. Mr. Corley went on, but about re-establishment of the service he considered it would be necessary for the cities to prepare for night flying.

Mayor Osborne pointed out that flying was not a new thing, but that it was required either for commercial companies or private flyers at the present time, but would be provided solely for the use of aeroplanes carrying mail for the post office department.

Senate Editor To Retire

Albert Horton Quits Office After Fifty Years' Service

Ottawa.—After half a century of service, Albert Horton, editor of Senate debates in Canada's parliament is to retire shortly, it was announced recently. He will be succeeded by David Halpin, at present of the Senate Hansard staff.

Mr. Horton has been a familiar figure on parliament hill since he was brought here in 1877 by Hon. George Brown, to report the proceedings in the Senate for the Toronto Globe.

Makes Endurance Flight

Los Angeles, Calif.—A new world's endurance flight mark for feminine flyers was attained by Miss Bobbie Trout, 19-year-old Los Angeles girl, when she landed her Golden Eagle plane here, setting a new continuous flight time of 12 hours and 15 minutes.

Tempest In Japan

Tokyo.—Seven hundred houses were reported destroyed, 56 persons killed and scores injured by storms on the Honshu coast, southwest of Nippon. Information received here that at least 30 villages were inundated by the high seas.

A Youthful Heroine

Brookville, Ont.—Charleston Lake has as its heroine a youthful heroine in Mary Allen, four, who succeeded in pulling her two-year-old sister, Fern, out of the waters of the lake after she dropped through in the thick ice.

Looking For Work

Detroit.—Milling about the employment office of the Ford Motor Company, at Fordson, a crowd estimated at \$2,000 men, responded to the announcement of the company that 30,000 additional men would be employed.

NOTES AND COMMENTS

The directors of the rink company intimated a short time ago that they were finding it increasingly difficult each year to finance the operation of the rink. If there is not sufficient revenue forthcoming to keep the rink open, there is the only alternative of having to close it. As a remedy, Mayor Burns in an interview with The Journal stated that the only course open that he could see would be for the shareholders to forfeit their shares, and to have the rink operated as a community concern, whereby all would be asked to contribute a sum of three dollars a year to provide the necessary funds. This proposal might well be discussed at the annual meeting of the ratepayers in order to ascertain public opinion. The closing of the rink would be a very distinct loss to the town, and the present financial difficulty indicates in unmistakable terms the necessity for some other method of financing.

The stand-patter is a drag on the wheels of progress. Did you ever see a self-satisfied person make anybody sit up and take notice? Certainly not! The stand-patter is quite satisfied to take the benefits that may accrue from the efforts of the go-getters, and to pat himself on the back if something comes to him for which he made no effort. But is he an asset to the community as a whole? He is a self-contained individual who is an asset to himself alone. He is quite satisfied with himself and travels the rut which invariably leads to the end of a blind alley.

There is far more to life than just accumulating worldly wealth. The securing of money for the sake of money alone is a miserly trait. It depends on what good use money is to be put to. If everyone hoarded money the working capital of the world would be so diminished that large numbers would have to take to the woods and live as our ancestors or the savages did. If Henry Ford had saved his pennies, would he be the world's benefactor in providing cheap cars for hundreds of thousands? You get out of life just what you put into it in human endeavor and effort to make it better than when you came into it, and there is plenty of scope for work of this nature no matter where you live. A question that interested us was noticed recently asking "can you imagine a Mussolini saving cards from cigarette packets?" There is a sermon in just that question.

The league games in hockey in the Crows Nest Pass this season have provided some good sport, and have helped to develop good players among the local boys. When a team was mooted for Coleman at the beginning of the season; the usual quota of wet-blanket artists asked "where are you going to get players from?" Surely they did not expect the local officials to try and repeat the experience of a few years ago by importing a bunch of players and pay them salaries just to play hockey. The intention was, and it has succeeded fairly well, to raise a team from the local material available, to pay its way from its gate receipts and also to give the rink company 35 per cent of the gate. The only assistance asked from business men was to purchase season tickets to the value of two dollars to buy the boys sufficient equipment to start with. The game of hockey is one that calls for endurance, speed and team work. No boy can stay in the hockey game and lead a fast or lazy life. He has to be in as near perfect physical condition as possible to stay in the game, and even for this alone, this hundred per cent. Canadian game deserves the encouragement of people who believe in developing a healthy, vigorous race of people.

If you can't boost for your home town for heaven's sake don't knock it. A man who does this kind of thing, to put it mildly, is a darned poor citizen, and is a walking example of the negative attitude towards life in general.

World-wide interest is shown in the meeting of the high council of the Salvation Army, the first of its kind in its history. Territorial commanders from all of the countries where the Army is established are meeting in London to discuss plans for the Army's administration, and much newspaper speculation has resulted. Staff-Captain Steele, of Alberta, who was in Coleman this week, stated he had no fear of the result of the conference, for he was confident that whatever decision was arrived at by the 45 representatives at the meeting, most of whom had served under the founder, William Booth, it would result in the strengthening of the Army's work in all countries.

As a social welfare organization the Army is unique, and millions will certainly hope that its mission in uplifting fallen humanity and bearing the cross of self-sacrifice will go forward stronger than ever, no matter what decision may be arrived at by the high council.

Here and There

(113) Ojibway Indians of the Nipigon district will not touch bear meat because they are mostly members of the Bear Club, says Oskar Ripley, the well known sporting writer. They are averse to killing the bear and one hunting party lately having to forego eating bear steak and having to bury a bear's carcass because their cook refused to touch the meat.

A trout weighing eight pounds was a catch reported last summer by William Mitchell in the neighbourhood of Banff, Alberta. "My record for the season is 396 fish," he writes, "all caught on rod and line within easy reach of Banff. Recently at Wapta I caught two six pound rainbows and several cutthroat weighing from two to three and a half pounds."

A record was hung up beside the Christmas stockings of the employees of the Canadian Pacific Express Company on Christmas Day when, from coast to coast, every Christmas package was delivered to its destination, except where there was no one to receive them. According to T. E. McDonnell, president of the company, express traffic was unusually heavy this season and was well handled.

Many enquiries for Reward wheat, one of the early ripening varieties evolved by the Canadian Government Central Experiment Farm, Ottawa, are being received by the Dominion Cerealists. The farm will have 10,000 bushels of this new wheat for distribution, and the 350 growers who were allowed to grow Reward in 1928 will have a surplus of 2,000 bushels making available 12,000 bushels for seed in 1929.

Production of agricultural implements and machinery in Canada amounted to \$42,996,288 in 1927, according to the Bureau of Statistics, as compared with \$38,252,214 for the previous year and \$24,776,216 for 1925. Of the 65 firms reporting, 42 were in Ontario, 12 in Quebec, 4 in Manitoba, 4 in Alberta, one in Saskatchewan and one in Prince Edward Island.

Antrob's Sell Good Shoes**ST. ALBAN'S CHURCH**

The annual meeting of the parishioners of St. Alban's Church, Coleman, will be held in the parish hall on Monday at 8 for the purpose of electing the wardens and vestry for 1929 and hearing the financial reports for 1928.

Sunday school at 2:30 p.m. Sunday, Jan. 13. Holy Communion 11:15 a.m. All those desirous of being confirmed at this time please let the Rector know by Sunday. Confirmation will be held on April 24.

The Rector has been requested by the Bishop to preach the sermon at the opening of Synod on Feb. 6th.

WORLD HAPPENINGS
BRIEFLY TOLD

The preparatory commission for a disarmament conference has been evoked to meet at Geneva on April 15.

Dr. J. D. MacLean, former premier of British Columbia, has taken an important post in the federal department of finances at Ottawa.

At a meeting of the selection committee in Winnipeg, Lawrence C. Bonycastle was selected as Manitoba Rhodes scholar for 1923.

English "with no American tinge" will be the world dominating language, Professor R. Dybowski, of Poland stated at the Modern Language Association meet, in Toronto.

Rudyard Kipling celebrated his 63rd birthday on his estate "Batoch" and the following day joined in celebration of his wife's 63rd birthday. Both days were spent quietly.

President Emilio Portes Gil believes that prohibition would benefit Mexico but he will attempt to keep the people from alcoholic beverages by distraction and education rather than by a sudden and severe law.

A new record for grain exports was established by the port of Montreal during the 1923 navigation season, when 202,575,951 bushels were exported, an increase of 17,608,844 bushels over 1922.

The well-known London chemist Hilton Jones, announced recently the discovery of a new gas, so deadly that it would make war "international suicide." Jones said the gas causes death instantly with the slightest inhalation.

Two new passenger steamers for the Canadian Pacific steamship night service between Vancouver and Victoria have been ordered in London. The new boats are to be delivered in 1930, and will each have sleeping accommodation for 425 passengers.

The annual Lewis gun competition of the Dominion of Canada Rifle Association has been awarded to the gun team representing "B" Company, Governor-General's Foot Guards, of Ottawa, it was announced at Ottawa. The competition was participated in by entries from units throughout the Dominion.

Concludes Greatest Year

Production In B.C. Industries Breaks Quarter Billion Mark

The year 1923 was by far the greatest in the history of British Columbia. The production of the province's four great industries, lumbering, agriculture, mining and fishing for the first time broke the quarter billion mark.

A conservative estimate, based on preliminary returns so far available to the government, would place the output at \$251,205,000, an increase of \$6,977,333 over the total for 1922, but final returns, especially from the lumber industry, may easily boost this a million or more.

A Famous Navigator

Plans Being Made At Coast For A Monument To Capt. Vancouver

Plans are being laid to raise money in Vancouver for the erection of a statue in honor of the famous captain who gave his name to what is now the biggest sea port on the American Pacific coast. Says the Vancouver Province, "We cannot emulate the imposing scheme of the Statue of Liberty. We cannot hope to spend a million dollars on our Captain Vancouver as the United States between them spent on their 335-foot high lady of the torch. But our Captain Vancouver should stand a memorial and a symbol, guarding our local habitation and our name, rising out of our sea, to be a witness for us that we honor him and that he laid our foundations. It should stand somewhere at the entrance of the harbor, in a high place looking down upon the ships as they pass, a landmark for the mariner by day, and a beacon light by night, visible far out in the Gulf."

Mexican Reporters Wear Pistols
It is as commonplace in a Mexican newspaper office for a reporter when he sits down to his desk, to take off his pistol and cartridge belt as it is in the United States for a news hound to remove his coat when he starts to write. Almost every reporter here carries a pistol, as do most men whose work requires them to be abroad at night—as well as a great many who have not that excuse for their armament.

Briquetting Plant

New Fuel To Shortly Appear On the Saskatchewan Markets

After more than nine years, during which more than a million dollars was spent in plant equipment and experimentation, a new fuel is shortly to appear on Saskatchewan markets.

It was March 20, 1918, that the order-in-council was passed which gave the required authority in the setting up of the Lignite Utilization Board of Canada. That body worked for years in an effort to produce a briquette from the vast stores of lignite in southern Saskatchewan, concentrating on a vast plant at Bismarck.

The original vote was for \$400,000, the federal government supplying half and the Saskatchewan and Manitoba governments supplying one-quarter each. After that fund was exhausted Manitoba dropped out and Saskatchewan and the federal government carried on. The grand total by governments, many thousands of which went into experimental equipment that had to be discarded, was \$1,036,300.

When it appeared that the whole scheme was to prove a failure and governments hesitated over putting up more money, British capital became interested and the moneyed men agreed to spend another large sum in experimental work at the plant, and, if successfully, to take over the plant for one dollar. Ernest Bury, generally considered the ranking industrial chemist in the British Empire, was placed in charge and, according to latest advice, has produced a type of briquette that is considered successful in every way.

One of every 2,000 children in England is effected by poor vision or the inability to read and spell.

More than 1,000,000 pounds of cotton yarn were produced in Japan in a recent month.

FAMOUS CATTLE BREEDER

J. D. MacGregor, owner of the Glencairn Stock Farm, Brandon, who recently sold a valuable herd of Aberdeen Angus cattle to Australia. These cattle were shipped over the Canadian Pacific Railway Lines.

Seize Russian Peasants

Frontier Guards In Poland Arrest Starving Peasants Seeking Food

Reports from the northern part of the Polish Russian frontier state that Polish frontier guards have been seizing Russian peasants who seek to penetrate Polish territory to get flour and fats in Poland.

The peasants are quoted as begging the Polish guards to permit them to obtain food in Poland in view of scarcity in Russia, adding that they have great trouble in obtaining permission to cross the frontier inasmuch as the soviet authorities feel that the peasants discredit the government by seeking food in a neighboring country.

More than 2,000,000 fir trees are used every Christmas in the British Isles.

CANADIAN CATTLE FOR AUSTRALIA

That Canada is one of the world's leading producers of high class cattle is well illustrated by the recent shipment of pure bred Aberdeen Angus cattle from the Glencairn stock farms, owned by J. D. MacGregor, of Brandon, Man., to the Australian Government. The shipment comprising 28 head, was selected by Mr. MacGregor and officials of the Australian Government. The picture shows some of these animals. Upper right, Glencairn Revolution, senior herd sire; upper centre, four of the prize animals. Upper left, Black Cap Blixie, one of the show cows; the lower picture shows a few of the prize animals.

After a trip from Brandon over the Canadian Pacific Railway lines, there was shipped on December 22nd, aboard the oil burning steamer "Huraki," sailing from Vancouver to Sydney, Australia, 28 head of pure bred Aberdeen-Angus cattle from the herd of James D. MacGregor, Brandon, Manitoba. This is an epoch making shipment because it is only the first shipment of Aberdeen-Angus cattle from Canada to our great Dominion below the equator, to Australia. The consignment comprises two lots—one of 18 females and two bulls for the government of New South Wales, and another of 6 females and 2 bulls for G. W. Mackey, Henbury Adominsky, New South Wales, Australia.

The idea of importing into Australia a herd of Canadian Aberdeen-Angus cattle originated with J. B. Cramsie, who is chairman of the Australian Metropolitan Meat Industry Board. Mr. Cramsie has supervision of abattoirs, stock yards and slaughter houses for the Australian government and some time ago he made a trip around the world for the purpose of gathering as much information as possible that would be of assistance to him in his efforts to provide better facilities for the handling of Australian meat products. During that trip he made a visit to Glencairn Farms, and became so deeply interested in the Doodles, that he decided to endeavor to interest private

individuals in his own country to make some purchases here. Finally, however, he succeeded in interesting the government of New South Wales, and later 18 females and 2 bulls were purchased, the entire transaction being arranged by cable. When the deal was finally completed, the government of New South Wales sent C. G. F. Grant, head herdsman, to Brandon, to inspect the consignment and arrange for its shipment to Australia. The Colin Campbell is in charge of the shipment on its long journey from Brandon to Sydney. Mr. Campbell has been in very responsible positions with leading herds for years, and he has had extensive experience in handling over-sea shipments, having made two trips to the Orient, and one to South America. The services of Mr. Campbell were secured by Mr. MacGregor to ensure the landing of the cattle in good condition so that they may be paraded at the Sydney Royal Show, which opens April 3rd, 1929, following which they will be shown at Melbourne and Brisbane. To fortify Mr. Campbell and his charges against a longer trip than is anticipated, 18,000 lbs. of rolled oats, six tons of bran, and 12 tons of hay were loaded with the cattle.

While upon examination one is impressed with the individual excellence of the animals shipped, students of Aberdeen-Angus breeding will be struck with the excellence of the breeding of every animal in

the consignment. Not only do they belong to the fashionable families—there are Blackbirds, Blackcaps, Elba Erica's, Miss Burgess, Elsie, Erica's, Enchantress Erica's, George's and several more of the breed's leading strains—they are descended from real working cattle on both sides of the pedigree. Most of the pedigrees show from three to four generations of Glencairn breeding, and many of them more than that. Such bulls as Edward Glencairn, the present herd sire, Blackcap Revolution, Edward of Glencairn, Euboras of Glencairn, Evreux of Harviestown, Faultless Pass, Enjolinder of Glencairn, Pride Lad of Homer, and Leary Red, of Meadowbrook, have had an important part to play in the creation of the great consignment of cattle to the land of the southern cross.

In order that the Australian people might get the very best possible impression of Canadian Aberdeen-Angus cattle, Mr. MacGregor selected practically his entire show herd to form part of the consignment for the New South Wales Government, and when C. G. F. Grant, head herdsman for that government, was in Brandon November 20th, to inspect the shipment, he stated that he was very highly pleased with the selections that had been made. In fact he ventured the opinion that the consignment would create a sensation in Australia.

Landing Device
For Planes

Matter Is Occupying the Attention Of the Government

The construction of an efficient landing device for planes, combining skis and wheels, is occupying the attention of government aeronautical engineers. Several forms are now being tested at Ottawa, but it is admitted that the problem is still unsolved.

The difficulty is one that is peculiar to Canada, air officials stated today. Airplanes frequently take off at one point, using wheels and on arriving at the end a few hundred miles' trip find it extremely difficult to land without skis. Air mail flights between Toronto, Montreal and the Maritimes are particularly affected.

SUNDAY SCHOOL LESSON

SIN

Golden Text: "If we say that we have no sin, we deceive ourselves, and the truth is not in us. If we confess our sins, he is faithful and righteous to forgive us our sins, and to cleanse us from all unrighteousness."—1 John 1:8, 9.

Lesson: Genesis 3:1-24; 6:5-8; Mark 7:14-23; Romans 1:18-32; 3:10-18; 1 John 1:5 to 2:6.

Devotional Reading: Psalm 51:1-10.

Explanations and Comments

What God Is, and What We Should Be, 1:5, 6.—The message which John had received from Christ (see verses 1-3), and which he now hands on, is that God is light, and in Him is no darkness (moral darkness, i.e. sin) at all. "Light, as here contrasted with darkness, means not intellectual illumination, but ethical perfection. It describes the absolute purity and holiness of God as He has been revealed in Christ."—A. S. Peake. God is spirit (John 4:21); God is light (1 John 1:5); and God is love (1 John 4:8). "Spirit, light, love are not mere attributes, they are Himself. They are probably the nearest approach to a definition of God that the human mind could frame or comprehend. The more we consider them, the more they satisfy us. The simplest intellect can understand and their meaning; the subtlet cannot expound it."—A. Plummer.

It is not possible to live in sin and at the same time to enjoy the fellowship of God. John next declares: "Walk in the light" (see verses 1-3), and which he now hands on, is that God is light, and in Him is no darkness (moral darkness, i.e. sin) at all. "Light, as here contrasted with darkness, means not intellectual illumination, but ethical perfection. It describes the absolute purity and holiness of God as He has been revealed in Christ."—A. S. Peake. God is spirit (John 4:21); God is light (1 John 1:5); and God is love (1 John 4:8). "Spirit, light, love are not mere attributes, they are Himself. They are probably the nearest approach to a definition of God that the human mind could frame or comprehend. The more we consider them, the more they satisfy us. The simplest intellect can understand and their meaning; the subtlet cannot expound it."—A. Plummer.

It is not possible to live in sin and at the same time to enjoy the fellowship of God. John next declares: "Walk in the light" (see verses 1-3), and which he now hands on, is that God is light, and in Him is no darkness (moral darkness, i.e. sin) at all. "Light, as here contrasted with darkness, means not intellectual illumination, but ethical perfection. It describes the absolute purity and holiness of God as He has been revealed in Christ."—A. S. Peake. God is spirit (John 4:21); God is light (1 John 1:5); and God is love (1 John 4:8). "Spirit, light, love are not mere attributes, they are Himself. They are probably the nearest approach to a definition of God that the human mind could frame or comprehend. The more we consider them, the more they satisfy us. The simplest intellect can understand and their meaning; the subtlet cannot expound it."—A. Plummer.

The Atonement For Sin, 1:7.—If we walk in the light, as He is in the light we walk; God is; we move through space and time; he is eternal; we have fellowship one with another (the nearer we are to God, the closer is our fellowship with one another).

"While we walk with God in light, God our hearts doth still unite; Dearest fellowship we prove, Fellowship in Jesus' love."—Charles Wesley.

A Good Commander

Who's that impressive-looking woman over there?

"That's Mrs. Peckum. She's a remarkable woman, and they say that she commands a very large salary."

"How does she earn it?"

"She doesn't earn it. Her husband earns it, and she commands it."

"Say, pa?"

"What is it?"

"If every day w'll be Sunday by and by, what will every other day be?"

"Well, Jim," asked the returned traveller, "have you married that sweet girl, or do you still dam your own socks?"

"Yes."

Love is the thing that makes a fellow want to pay a girl's board bill when he can't pay his own.

"I have been all round and cannot get a car anywhere."

"Have you tried the ditches?"—Pages Gates, Yverdon.

CHAPTER XI.—Continued

For hours Donald followed the expert through the mill, while the latter explained and tested the different motors.

Once a week Robert Rennie came to the mill, taking a keen interest in all phases of its construction, and invariably he went away with a pleased smile on his face.

"Never saw the old man so worked up," commented Gillis. "Guess he's like to come up here and run her himself."

Ranwick was still skeptical. For no apparent reason he had taken a dislike to Donald. "It's just 'cause you and I are such good friends," explained Gillis. "Me and him get on like a couple of strange bull-dogs."

When the huge three-storied mill, with its dry kiln, lumber skids, conveyor shed and railroad spurs, was ready for operation, and each machine had been tested, Robert Rennie arrived with other officials of the company. Next morning Donald's gig thumped as the mill's big whistles sent out its first call to work and the men filed eagerly to their posts. The logs were sprayed with huge water-jets as they came up the chain-haul to clean them of the gravel and debris. The electric "nigger" spun them about and threw them into place with a thud that shook the mill. Then in a wild crescendo of sound there rose the harsh chorus of saws, the singing howl of the cut-off, the strident, snoring sound of the gang-saws, and the staccato snarl of the trimmer.

Smiling and rubbing his hands, Robert Rennie walked through the mill. "Running like a greased pig," shouted Gillis above the clamour. The owner of the R. C. & L. Co. so far forgot his decorum as to slap the astonished Gillis heartily on the back.

Donald noticed an ever-increasing irritability on the part of the logging foreman during the next week. The erstwhile jocular Gillis became sullen and morose. Donald got an inkling as to the cause of his friend's gloom when he heard Gillis in conversation with Andy.

"What the 'ell's the matter, you big lunkus? You're like a bear with a sore foot," complained Andy.

"If my gang don't get here pretty soon, and I have to put up with this crowd of boobies much longer, I won't be fit to live with," growled Gillis.

Short of Breath

Smothering Feelings
Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and at times it was so bad that I was unable to go a short distance, because of the choking sensation which followed."

After trying many treatments, in vain, I at last decided to try

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1707

Gillis's gang of "redshirts" were known the length and breadth of British Columbia. Employers bid high for their services, but for many years they had stuck loyally with Gillis and the R. C. & L. Co. At present they were employed by the Company in one of their camps up the coast, but at Gillis's earnest request, Robert Rennie had promised to send them to Summit Lake.

Gillis's "redshirts" had the well-earned reputation of being the wildest crew of lumber jacks west of the Rockies. "They're wild, all right," Gillis had admitted; "a swarthy, drunken, fighting gang of roughnecks. But holy mackerel! How they boys can log!"

That night Gillis confided his troubles to Donald. "I don't know what in tarnation's to become of loggin' in years to come if things keep on as they are now," he began in a despondent tone. "It used to be that when you sent down town for loggers you got loggers. But now, with a gesture of disgust, 'you get a lot of silk-stocking, mandolin-playin', gum-chewin', smooth-haired guys, or else a bunch of snuff-chewin', garlickin', macaroni-sauin' boobies, whose names sound like a war in Central Europe.'"

Sighing reminiscently, he continued: "I often wonder if it's because I'm gettin' old; but, you know, when I look back on the days, when we logged with bull teams, it seems to me that the men at that time liked to work. I can still see the old timers in their whiskers, and their big black hats and flannel shirts, as they sailed out on the old Comox or the Cassiar. He shook his head sadly. "Ah! there was only one kind of loggin' in them days."

Seeing that Donald was interested, he went on: "Yes, there's two kinds of loggers nowadays, Donnie, the 'single-brusted' and the 'double-breasted.' And there's a hell of a lot of difference between the two. The 'single-brusted' logger is a man that don't speak anything but English, an' he don't belong to the 'I won't work' neither. He knows loggin' from A to Z; don't mind sleepin' in a bunk, and always carries his own blankets. If he borrows a ten-spot of you, as soon as he gets it he comes lookin' for your slaps you the money, grabs you by the hand, and lookin' you straight in the eye, says, 'Thanks, friend, come and have a drink.' At night, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the boss, read the paper and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'."

"But this 'double-breasted' he snarled disgustedly, 'he's a mixture of a taxi-driver, bartender and soap-box orator, and because he lives in B.C., he thinks he is a logger. He knows the difference between a fallin' saw and a buckler's saw, that's just about all he knows. If he borrows a dollar off you, the minute the bill slips out of your hand you can see a look in his eye."

"You're looked," and the devil of it is that he won't cross to the other side of the street when he sees you comin', but he'll walk right up to you a-smilin' and ask you for another buck."

"When he gets through at night he cleans his finger-nails and picks on a mandolin while he tells how many James is stuck on him in Vancouver; gives an opinion that the shower-bath was not hot enough, and how we sufferin' workers should rise against the capitalists. He'll kick at the breakfast table because there is only oranges and no grapefruit. When he goes in the woods he'll throw a few tools away so's to help the cause of the workers."

"Workers!" he exploded, as he came to his feet and walked the floor, "we've got too many 'double-breasted' and 'bunks' in this camp right now, Donnie. A bunk will work if you show him a pick and shovel, but these other guys are trouble-breeds. Did you see that big brute that came in today?"

Donald remembered seeing an enormous man with narrow, fishy eyes in the crowd of men sent by the employment agency.

"That's of 'em. Hand. He's a bad egg. I s'pose I'd ought to fire him, but he's a good logger, and they are mighty scarce 'round these diggins'."

He yawned sleepily. "Got to fix a 'spar-tree' for a 'high-lead' tomorrow, so I better hit the hay."

Preparing the "spar-tree" for "high-lead," or "sky-line" rigging, is the most spectacular and thrilling performance in the logging industry. A standing tree is trimmed of top and branches, then strengthened with guys. With the pull coming from this altitude, the advantage over the straight ground pull is enormous as logs are lifted high in air over all impediments. The men who do this hazardous work are known as "high-riggers."

Next morning, a man with a short-

PILES
are quickly
Soothed & Healed
by
7am-Buk

handed axe, wearing a wide belt to pass around the tree-trunk, and a pair of linemen's spurs, slowly climbed a big fir. As he ascended he trimmed the trunk clear of limbs. Quite a crowd gathered, among them the trapper, with his rifle on his arm.

"I ain't got a 'high-rigger' in the outfit," growled Gillis. "This fellow agreed to trim her, but he says he never chopped the top off one, so I guess we'll dynamite her."

The explosive, with a detonating cap, was tied to the top of the tree and wires strung to the ground. For some reason the batteries would not act, and Gillis chafed under the delay.

"I kin set her off for ye," said the old trapper.

Gillis turned to him. "How?" The trapper tapped his gun. "Put a piece of paper on the cap so I kin see her and I'll pop it."

"That's a new one on me," laughed Gillis.

He sent the man aloft to place a square piece of pasteboard on the cap. The man moved back from the foot of the tree, and Gillis gave the signal that all was clear. The old man sprang briskly to the top of a stump, tipped his big hat to the back of his head, and raised his rifle slowly. For an instant the long barrel, wavering slightly, then steadied. The report of the rifle was drowned by a splintering crash. The heavily-branched top lifted, then came hurtling through the air to strike the ground a mass of wreckage. For a moment the big spar wayned dizzily from the shock, then stood straight and rigid. Deprived of its fronds of green, it appeared a ghastly relic of its former self.

That afternoon, as they waited the arrival of the train, Gillis talked again of his "red-shirts." "White men, every one of 'em," he declared proudly, "and everyone of them with a nickname that is known all over the Coast. Ye just ought to see my two 'high-riggers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cut her off, wavin' his hat and yellin' 'Hoop-la.'"

"I got five Jack McDonaids in the gang. Their names are 'Sly' Jack, 'Fightin' Jack,' 'Check-Book' Jack, 'Johanne-On-The-Spot,' and 'Crazy' Jack." If everyone of them with a nickname that is known all over the Coast. Ye just ought to see my two 'high-riggers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cut her off, wavin' his hat and yellin' 'Hoop-la.'"

"I got five Jack McDonaids in the gang. Their names are 'Sly' Jack, 'Fightin' Jack,' 'Check-Book' Jack, 'Johanne-On-The-Spot,' and 'Crazy' Jack." If everyone of them with a nickname that is known all over the Coast. Ye just ought to see my two 'high-riggers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cut her off, wavin' his hat and yellin' 'Hoop-la.'"

The train rumbled to the station and the usual crowd of workers came pouring from the cars, while a crowd stood waiting to board the train. It was the same every day—men coming and men going.

Gillis uttered a glad cry. "Here they are!" A big, ostentatious man, with broad shoulders and narrow hips, stepped to the platform. His dress was truly colourful and striking—white hat, high boots, a vivid scarlet shirt, with a cloth belt of the same bright hue tied at the side, the ends dangling loosely.

"Get out of the way, hunkies, and make room for a logger!" he roared as he showed his way through a crowd of scattering foreigners, behind him a line of men clad in the same brilliant attire.

"Hello, Hoop-la! you ornery ol' skater!" bellowed Gillis.

The big man turned. "Here he is, fellers!" he shouted.

In a moment Gillis was surrounded by this picturesque crew, howling tautous greetings.

"Hello, ol' hoss!" "Hello, you son-of-a-gun!" "How the hell are ye?"

Donald was subjected to crushing handclaps as he was introduced to each and every one of this crowd of husky loggers.

As Donald studied them he did not wonder at Gillis's pride in these men.

FROST BITTEN.

Relieve the pain of cold-bitten cheeks or ears with Minard's. It will soothe and heal.

With the exception of Blackie, there was none under six feet in height, and they carried themselves with a loose swing that was almost a swagger. Many of them were well past middle age, some quite gray about the temples. They were all filled with the sparkling health of the great outdoors, their skins the colour of mahogany.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published By The Student Dental Society

TOOTH EXERCISE

You have read considerable of late about the "dilly dizen," and other such setting-up exercises. And soch you know, of course, that the body requires exercise if it is to develop and keep fit.

You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

But perhaps you have never given thought to the beneficial effects of thorough mastication on the tooth structures themselves.

In the first place, then, there is the stimulating effect on the supporting structures of the teeth, giving them proper "tissue tone."

In the growing child, the development of the teeth, is impossible without sufficient masticatory exercise.

Former generations ate hard and coarse foods, and suffered little from dental trouble.

Mastication of tough uncooked food gave to their teeth and jaws sufficient exercise to promote the most vigorous circulation and a very decided massage of the gums.

These agencies through the abundant blood supply to the jaws provide ample tissue nourishment for growth and development along with great power of resistance to infection.

Today, we are using a great many over-refined and pre-digested foods, which require little or no chewing, and in the use of which the mechanical effects from the scrubbing of the tooth surfaces are lacking.

With the result that Nature working out her inexorable law, that a member that is not functioning as efficiently loses its efficiency, is making the tooth structure softer and less resistant to disease.

There should be, therefore, an habitual use at each meal, of foods selected not only on account of their nutrient quality, but because they are of such a nature as to require vigorous masticatory effort.

Grippe! Flu! Influenza!
Raging Through Canada

Preventive measures are advisable with so much Grippe in the air. Keep throat and nostrils clear of infectious germs by inhaling the balsamic vapor of Catarrhone. By this means you get the healing and soothing properties of the famous "Blue Gum of Australia" all through the passages of the head and throat.

Catarrhone stops a grippy cold, its splendid for irritable throat, relieves headache and quickly drives out the germs of Flu, Influenza, Grippe and Bronchitis. Get Catarrhone today. Complete outfit, \$1.00, and lasts two months; smaller size 50c at all druggists.

Caught By Americans

Now we know why the fish don't bite any more. They are finding their way into the Great Lakes to be caught by American fishermen. Last year these fishermen took 23,796,000 pounds out of Lake Erie, 23,688,884 pounds from Lake Michigan, 15,710,731 pounds from Lake Huron, 15,301,562 pounds from Lake Superior, and 667,821 pounds from Lake Ontario.

Excellent For Croupy Children.

When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

A Berlin husband advertises his matrimonial troubles in a local paper: "My pious, faithful wife has departed from me. Will the honorable finder please keep her?"

Always keep Minard's Liniment handy.

Notable Rocky Mountain Pass. Jarvis Pass, a densely timbered crossing on the Alberta-British Columbia Interprovincial railway, is remarkable for containing a number of small lakes on its summit, distributed on both sides of the watershed.

The water from some of the lakes flows westward to the Pacific, while from the others it runs eastward to the Atlantic.

Santa Claus should be spelled Santa Klaws. The name is Dutch for St. Nicholas.

Experience is what 'one gets while looking for something else.

To Check
Flu-GripFight the Germs with Vapors
Before They Can Get a Start

Treat All Colds Promptly
But Be Careful Not to
Disturb the Digestion
With Too Much Dosing

through the skin like an old-fashioned poultice, "drawing out" tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach

This simple external treatment cannot disturb your digestion as too much "dosing" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu

When influenza colds are prevalent, you can avoid prevent infection by sniffing a little Vicks well up the nostrils every night and morning, or before exposure to crowds.

Little Helps For This Week

"Freely ye have received, freely give."—Matthew x. 8.

The Hand that strews the earth with flowers

Enriches the marriage feast with wine;

The Hand once pierced for sins of ours.

This morning made the dew-drops shine.

It freely gives its very best.

Not barely what the need may be.

But for the joy of making blest;

Teach us to live and give like Thee.

Not narrowly men's claims to measure.

But daily question all our powers.

Whose path can we add a pleasure.

To whose path can we make bright with flowers?"—Elizabeth Charles

Opportunities come reaching out their hands to us every moment, not to do great things perhaps, but for the "Little, daily, unremembered acts of kindness and of love," that take off the chill from our undemonstrative matter-of-fact intercourse with one another, and keep our hearts from starvation.—Lucy Larcom.

Hockey players use Minard's Liniment.

There is such a thing as being too persistent at times.

Newly Arrived Missionary: Tell me what became of the man who had this position before me? Cannibal Chief (patting himself on stomach with reminiscent grin): He took a trip to the interior.

A PERFECT MEDICINE
FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Maud—"So you married your employer. How long did you work for him?"

Myrtle—"Until I got him."

will be completed in January. It is
now thought. All that remains to be
done to the 2,000,000 bushel struc-
ture is to complete the three gal-
leries and the marine tower.

A Chicago Holstein breeder has
made a special offer to H. H. Thom-
son of Bradbury Farm, Bohara, Sas-
katchewan, for his world champion
Holstein cow, Canary Kornelke
Alasara; but representations are
being made to the Provincial Gov-
ernment to have this famous ani-
mal retained in the province.

"You don't have to sell the idea
of game protection and conserva-
tion to sportsmen," said James W.
Stubbs, well known sporting writer
who attended the recent banquet in
Montreal of the Quebec Association
for the Protection of Fish and Game.
"The problem is to convince the
settler and guide in the pack-
woods that a surplus of game for
the attraction of the hunter means
money in their pockets and a source
of revenue to many classes in
the community."

The Santa Claus team of fairy
reindeer must be having an exciting
time these days in keeping pace
with modern delivery methods, for
Christmas presents shipped by Cana-
dian Pacific Express are being
speeded through the clouds by air-
planes. Between Quebec, Mont-
real, New York, Ottawa, and To-
ronto, in the east and Win-
nipeg, Regina, Calgary, and Ed-
monton in the west, airplanes
have been busy this season carry-
ing air mail and express matter
and many delayed shippers have
been able to have their presents
delivered before Christmas by
using the air express service.

Vancouver is rolling up its left
handed trousers in preparation
for the four day Sea Music Festival
to take place at the Hotel Van-
couver from January 23 to 26.
Cheery sea chants and famous salt
water ballads that have been sung
by sailors for many centuries will
be presented at this novel music
festival, which promises to be one
of the most popular and important
events of the season in the west.
It will be preceded by a Yuletide
Festival at the Empress Hotel at
Victoria, when Christmas carols
will be sung by well known artists
and many quaint old customs will
be revived by the players.

Having successfully completed
her trials off Scotland the new
Canadian Pacific British Columbia
coastal steamship "Princess Norah"
will arrive shortly at Victoria,
Vancouver Island. The new ship
is the seventeenth "Princess" of
the company's fleet and is equipped
with bow rudders to facilitate na-
vigation in the narrow channels of
the west coast.

Canadian seed wheat is in con-
siderable demand in South Amer-
ica according to officials of the
agricultural department of the
Canadian Pacific Railway at Win-
nipeg. A ton of seed wheat was
recently shipped from Brandon to
Peruvian wheat ranchers, and it is
expected that further orders will
come from the South American
republic.

Less than a minute was required
to launch each boat when the life
saving equipment of the Canadian
Pacific liner "Duchess of Bedford"
received its regular test at New
York recently before embarking
its Christmas cruise of the West
Indies. "The finest and most ef-
ficient boat lowering apparatus I
have ever seen," was the comment
made by John J. Grady, head of the
United States steamship inspection
service, who was present at the
test. The "Duchess of Bedford" is
one of four sister ships of the new
"Duchess" class all of whom are
speedy oil burners and equipped
with the same efficient life saving
apparatus for use in an emergency.

The finest show herd and the
only shipment of its kind ever sent
out of Canada is now on its way to
Australia. Twenty seven animals,
three bulls and 24 females, the
cream of James D. McGregor's
famous Glenearnock stock farm,
have been loaded into C. P. R. cars
and started on their long journey
to New South Wales. Twenty of
the animals will be used for the
foundation herd of the government
animal husbandry department,
while seven others will go to pri-
vate purchasers. All are of the fin-
est stock raised by the leading
Aberdeen Angus breeder and most
of them have won prizes at fairs
and stock shows throughout the
continent.
